

HEARTLAND
ENGINEERED PRODUCTS

SUPERIOR-QUALITY, STRUCTURAL STEEL PLATFORMS AND MEZZANINES DESIGNED FOR YOUR UNIQUE APPLICATIONS.

Custom design and engineering to your precise specifications—optimizes space, reduces waste and helps streamline processes.

- Design for IBC, OSHA codes or any applicable standards and codes
- The ability to incorporate extreme load capacities and wide clear spans
- Advanced design technology for fast, accurate structural analysis and load calculations
- I-beam construction for greater durability and load capacity with fewer columns
- Bolted joints for easier assembly and long-term strength
- Deck options include coated or uncoated ResinDek, bar grate, concrete ready, diamond plate or wood decking
- P.E. Seal and calculations for all 50 states, as needed
- A wide variety of handrail, gate and stair and crossover configurations complete the environment
